NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Louis Schisa, Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
February 1983

Civilian Labor Force

The number of employed New York State residents increased 16,000 from January 1983 to 7,164,000 in February 1983. However, compared with February 1982, the current resident employment level was down 152,000.

Joblessness in the state was virtually unchanged between January and February 1983, edging downwards 1,000 to 754,000. Since February 1982, the number of persons seeking work has risen 32,000.

The state's rate of unemployment in February 1983 improved slightly from a month ago, declining 0.1 of a percentage point to 9.5 percent.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) totaled 7,100,400 in February 1983, or 11,900 higher than the January 1983 figure. This increase, which was 14,200 less than the average January-February upturn for the past five years, reflected below-normal hiring and continuing cutbacks resulting from a weakened economy.

Over the month, manufacturing employment rose by 6,300--about 4,900 less than the usual pace for this time of year. Nondurable goods job gains were below normal (+9,000) but still outweighed recession-related durable goods job losses (-2,600). Anticipated recalls in the apparel industry (+7,900) accounted for most of the advance in soft goods employment. Job increases in the women's outerwear category highlighted the employment expansion in the apparel industry. Smaller seasonal gains were registered by the textile (+1,100), miscellaneous manufacturing (+1,100), and leather (+800) industries. Hiring in the knit outerwear category accounted for the rise in textile payrolls, while job additions in the toy-making industry led the upturn in miscellaneous manufacturing employment. The job gain in the leather industry was below average, although the increase was spread throughout the industry. The paper products (-500), chemical (-500), and printing and publishing (-400) industries all experienced job cutbacks resulting from reduced business. The decline in paper products employment reflected, in part, a strike in the converted paper and paperboard industry. The only other soft goods loss occurred in the food industry (-500), which was down seasonally.

Large scale incentives for early retirement, coupled with lack of new orders, prompted the decline in hard goods jobs. Attrition-related job reductions were primarily responsible for the large decrease in the historically robust instruments, photo and optical goods industry (-2,300). The nonelectrical machinery (-1,300) and electrical machinery (-200) industries both cut back jobs as new orders declined. Seasonal influences led to a loss of 400 jobs in the stone, clay, glass, and concrete industry. Job gains in the transportation equipment (+1,000), primary metals (+300), and fabricated metals (+200) industries tempered these decreases. Hiring to meet increased demand for motor vehicle parts and accessories caused the upturn in transportation equipment jobs. A modest influx of orders was responsible for the job additions in the primary metals industry. Payroll expansion in the metal forging and stamping industry dominated the gain in fabricated metals employment.

The nonmanufacturing job gain of 5,500 in February 1983 was 9,400 below the normal January-February upturn. Less-than-average seasonal hiring, combined with unexpected cutbacks, was responsible for the comparatively weak job advance. The bulk of the nonmanufacturing payroll gain was centered in the services division (+16,200) and the public sector (+8,600). Most of the growth in services employment occurred among private colleges and universities which were recalling furloughed nonteaching personnel following the mid-year recess, and among membership organizations which were up seasonally. The largest share of the advance in public employment was located in local education, which like its private counterpart, was recalling nonteaching staff at the beginning of the spring semester. The finance, insurance, and real estate industry group (+300) posted a small job gain in the brokerage industry. These increases were softened by job losses in the remaining nonmanufacturing divisions, with the largest declines reported by trade (-10,500) and construction (-7,100). Seasonal cutbacks among retail department stores were the main reason for the downturn in trade employment. Construction payrolls dropped as expected, with most of the reduction contained in the special trade contractor segment. The transportation and public utilities division's job level was down (-2,000) in contrast to prior years, primarily because of layoffs in the air transportation industry and below-normal hiring in the communication industry. Normally, February job gains in the communication industry offset seasonal losses elsewhere in the division.

Over the past 12 months, the state has lost 57,300 nonfarm jobs, with the factory sector down 76,200 jobs--the largest loss among the industry divisions. The only bright spots occurred in the services division, up 29,400 jobs, and in the finance, insurance, and real estate group, up 10,400 jobs over the year.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1982

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1982

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 of more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organization were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Prior to January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were excluded from covered employment. Beginning January 1, 1978, the services of these employees are covered by unemployment insurance.

Agricultural labor is also newly covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Data for employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are excluded from this series. Employment and payrolls of persons in private industry only are reported in this series.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual,* and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all private employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover *all wages and salaries* paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1967 edition. Structural changes as a result of revisions in the *Manual* are incorporated in data beginning with the first quarter of 1975.

When a 2-digit manufacturing industry has less than 100 employees or less than four reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining, and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below.

--**Albany-Schenectady-Troy.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton.* Broome and Tioga counties.
--**Buffalo.* Erie and Niagara counties.
--**Nassau-Suffolk.* Nassau and Suffolk counties.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties.
--**Rochester.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
--**Syracuse* Madison, Onondaga and Oswego counties.
--**Utica-Rome.* Herkimer and Oneida counties.
-- *Westchester.* Westchester County.

*Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the new York State Unemployment Insurance Law.

Table 1. REPORTING UNITS, EMPLOYMENT AND PAYROLLS COVERED BY UNEMPLOYMENT INSURANCE, NEW YORK STATE, BY INDUSTRY JULY-SEPTEMBER 1982

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
THIRD QUARTER 1982

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

B-PUBLICATIONS--Continued

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

LABOR RESEARCH REPORTS--Continued

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, and part-time and temporary employment. Experiences of responding firms with various programs are presented in the report.

MONTH IN REVIEW
March 1983

Civilian Labor Force

Resident employment in New York State rose 88,000 from February 1983 to 7,252,000 in March 1983. Compared with a year ago, the current jobholder level was lower by 117,000.

Total unemployment in the state in March 1983 was 792,000, a gain of 38,000 from a month ago and an increase of 100,000 from a year ago.

The rise in unemployment caused the state's jobless rate to swing upwards by 0.3 of a percentage point from February 1983 to 9.8 percent in March 1983. Since March 1982, the rate of unemployment has increased 1.2 percentage points.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in March added 32,200 jobs to the February 1983 total, bringing the job count to 7,132,600, with nearly all of the expansion in the nonmanufacturing sector. This gain was more the 13,000 below the average February-March upturn over the past four years -- the shortfall could be traced to cautious seasonal hiring, early retirements and recession-related cutbacks.

Nonmanufacturing payrolls were up 31,300 between February and March 1983 -- well below the usual pace for this time of year. Approximately 60 percent of the nonmanufacturing increase occurred in the services (+10,800) and trade (+8,100) industry divisions. The rise in services payrolls was shared by nearly all of its components, with over two-thirds of the job expansion occurring in health services, amusement and recreational services, and business services. Hiring by restaurants and retail apparel stores in anticipation of the Easter shopping season accounted for most of the staff buildup in trade. Seasonal influences were also responsible for the employment increases among the remaining nonfactory groups. The approach of milder weather triggered the upswing in construction activity (+6,000), while staff additions in local education accounted for most of the boost in government jobs (+5,200). The finance, insurance, and real estate group posted a small gain (+2,400), primarily because of payroll expansion in the brokerage and real estate industries. Except for services, all of the above industry divisions experienced below-normal February-March job gains. The only nonmanufacturing industry group to show an over-the-month employment loss was the transportation and public utilities group (-1,400), down largely because of job cutbacks in the communications and air transportation industries.

Manufacturing employment inched upwards 900 in March 1983 as weak nondurable goods job growth barely outweighed payroll losses in the durable goods segment. Normally, factory payrolls increase substantially from February to March because of seasonal growth in nondurable goods jobs.

Nondurable goods employers in March added 3,200 jobs to their February payrolls -- about 2,600 less than the average February-March gains over the past four years. Although the apparel industry (+2,800) dominated the job additions among the soft goods components, its gain was relatively mild. The tempering effect of contraseasonal job losses in the chemical (-600) and printing and publishing (-100) industries, plus greater than normal cutbacks in the food industry (-1,000), also contributed to the poor showing in soft goods jobs. Lack of product demand led to the layoffs in these industries. The job gains among the remaining soft goods industries followed, in large part, normal seasonal patterns, except for hiring due to a pickup in product demand in the miscellaneous manufacturing industry (+700) and below-normal hiring in the textile industry (+400). The paper industry (+200) registered a small gain because of the return to work of strikers in the paperboard industry.

The durable goods segment, which lost 2,400 jobs over the month, was dominated by induced attrition in the historically robust instruments, photo and optical goods industry (-3,200). Employment in this industry has been declining in recent months as employers have reduced operating costs by offering early retirement incentives to employees. The fabricated metals industry reported a notable job decline (-500) in response to slowed business activity. Job gains in the majority of the remaining hard goods components tempered these losses. The most significant gains occurred in the lumber (+400) and electrical machinery (+400) industries. These industries, which normally show little job level change in April, were both enjoying increased product demand.

Since March 1982, the state's nonfarm job count has declined 65,100, with the manufacturing sector accounting for 78,000 or all of the reduction. Among the industry divisions, the only significant over-the-year improvement occurred in the services (+29,700) and finance, insurance, and real estate (+9,500) groups.

[1] Unemployed as percent of combined total of employed and unemployed.

1982 IN REVIEW

Vincent F. DeSantis, John P. Wong and
Roger W. Gerby

Civilian Labor Force

The state's civilian labor force, although reaching a record high, grew by only 3,000 in 1982 as unemployment increased and employment declined. For the third time in four years, 8 million or more New York residents were in the labor force.

Total employment contracted 72,000 to 7,339,000 from 1981 to 1982, the lowest level since 1978, a year of employment expansion. The number of residents with jobs in 1982 was 445,000 higher than the average for 1975 and 1976 when New York State was in a period of sharp economic decline.

In 1982, the number of jobless state residents rose sharply by 74,000 to 687,000 -- the highest level in five years. Unemployment has risen each year since 1979. The jump in 1982, although steep, was moderate if compared to the increase of 245,000 between 1974 and 1975.

The unemployment rate for the state rose to 8.6 percent in 1982, a full percentage point above the 1981 average and the highest since 1977 (9.1 percent). In 1977, the state was still adjusting from the effects of the 1973-1975 recession. The annual average jobless rate compared unfavorably with recent years. For each year from 1978 to 1981, the jobless rate averaged between 7.0 and 8.0 percent: a 7.7 percent average in 1978, a 7.1 average in 1979, 7.5 in 1980, and 7.6 in 1981.

While a substantial increase occurred in the overall unemployment rate, the percentage of unemployed among some demographic groups actually declined. The jobless rate for blacks fell 0.9 of a percentage point, from 14.7 percent in 1981 to 13.8 percent in 1982. The unemployment rate for whites, meanwhile, reached 7.8 percent in 1982, up 1.2 percentage points from 1981. At the same time, labor force participation on the part of whites decreased 0.4 of a percentage point to 59.6 percent. The decline in labor force participation on the part of blacks was more severe, a drop of 1.7 percentage points to 57.1 percent. The decline in the unemployment rate of black persons reflected less participation in the labor force and not an increase in employment.

Both Sexes, 16-19 Years

In 1982, the unemployment rate for teenagers (16-19 years of age) already high, inched upward by 0.5 of a percentage point to 22.4 percent. The labor force participation rate, particularly among black youth, declined.

Men and Women

From 1981 to 1982, the jobless rate for men jumped 1.1 percentage points to 8.5 percent, while the jobless rate for women climbed 0.8 of a percentage point to 8.7 percent. Participation in the labor force declined for both sexes, but more so for women.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) averaged 7,234,100 in 1982, down 53,200 jobs from 1981 -- the first year-to-year job loss since 1976. Large manufacturing job cutbacks overshadowed modest nonmanufacturing job gains. Factory job losses were the most numerous since the severe cutbacks that occurred between 1974 and 1975 when the economy was also mixed in a recession.

Employment in the nonmanufacturing sector increased 18,300 from 1981 to an annual average of 5,872,300 in 1982, another record high. The 1982 advance, however, was roughly one-fifth as large as the average gain from 1976 to 1981. Three nonmanufacturing industry divisions increased in employment between 1981 and 1982 while three decreased. Job gains in the services division were the largest (+32,000), followed by finance, insurance, and real estate (+15,600). The growth in services employment was only one half that of recent years. The employment gain in finance, insurance, and real estate was in line with recent experience. Construction expansion (+600) lagged far behind its annual increase for the last five years.

Trade (wholesale and retail combined) was the biggest nonmanufacturing job loser (-11,400), followed by government (-10,600), and transportation and public utilities (-7,800). In the last five years, jobs increased in

Table 2. NEW YORK STATE NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT BY INDUSTRY ANNUAL AVERAGES, 1982 AND 1981

(In thousands)

Industry	1982	1981
Total nonagricultural employment	7,234.1	7,287.3
Manufacturing	1,361.8	1,433.3
Durable goods	701.2	741.9
Nondurable goods	660.6	691.4
Mining	6.4	6.4
Construction	213.8	213.2
Transportation and public utilities	421.9	429.7
Wholesale and retail trade	1,454.3	1,465.7
Finance, insurance and real estate	670.5	654.9
Services	1,815.8	1,783.8
Government	1,289.7	1,300.3

NOTE: Estimates are based on the 1982 CES benchmark.

Table 3. CHANGE IN NUMBER OF JOBS BY INDUSTRY NEW YORK STATE, 1981-1982 AND 1976-1981 AVERAGE CHANGE

(In thousands)

Industry	1981-1982	1976-1981 change
Total nonagricultural employment	-53.2	+99.6
Manufacturing	-71.5	-1.1
Durable goods	-40.7	+6.9
Nondurable goods	-30.8	-8.1
Mining	0.0	-0.1
Construction	+0.6	+4.8
Transportation and public utilities	-7.8	+0.3
Wholesale and retail trade	-11.4	+10.3
Finance, insurance and real estate	+15.6	+15.9
Services	+32.0	+64.2
Government	-10.6	+5.3

each of these divisions, although barely so in transportation and public utilities. The number of mining jobs was unchanged between 1981 and 1982. (See Table 3).

The manufacturing sector's job count, at 1,361,800 in 1982, was down 71,500 from 1981. This loss represented a rapid acceleration in factory job erosion due to the national recession and fundamental changes in the nation's and state's competitive position in many manufacturing industries. The losses were shared by the durable goods segment (-40,700) and the nondurable goods segment (-30,800). Employment in all durable goods industries declined, excluding the historically robust instruments and related products industry. Job losses were heaviest in primary metals (-9,900), nonelectrical machinery (-9,800), transportation equipment (-7,700), fabricated metal products (-6,700), and electrical machinery (-5,000).

Among nondurable goods industries, employment increased slightly in two industries and decreased in all others between 1981 and 1982. Job cutbacks were most severe in apparel (-8,600), food (-4,300), miscellaneous manufacturing (-3,800), textile (-3,300), chemicals (-3,100), and rubber and plastics (-3,000). Tobacco (+100) and printing and publishing (+400) were the only nondurable goods industries with job gains.

Seasonally Adjusted Nonfarm Employment

With the influence of seasonal factors removed, nonfarm employment decreased from one month to the next in nearly all of 1982. Seasonally adjusted nonfarm employment was 7,204,800 in December 1982 or 62,600 below the January 1982 level of 7,267,400.

Unemployment Insurance Beneficiaries

A total of $1,374 million was paid to jobless workers in New York State in 1982 under a variety of unemployment assistance programs. A year earlier, these benefits totaled $1,090 million. In an average week of 1982, approximately 320,000 persons were collecting benefits under these programs, compared with 272,000 in 1981.

These programs provided up to a total of 34 weeks of jobless benefits during 1982 as described below:

- The New York State Unemployment Insurance Law provides for payment of up to 26 weeks of regular benefits to eligible jobless workers. These benefits are paid from the state Unemployment Insurance Fund, which is financed by contributions from New York employers. In 1982, $1,211 million in benefits was paid to jobless workers under this program, compared with $944 million in 1981.

- Standby legislation under the Unemployment Insurance Law provides for the payment of an additional 13 weeks of extended benefits during periods of high insured unemployment to persons who have used up the basic 26-week allowance. This program "triggered" on in July 1980 and "triggered" off in January 1981 based on the national "trigger" computation. There were no extended benefits in 1982. Payments under this program, for the most part financed one-half by the state Unemployment Fund and one-half by the federal government, amounted to $27 million in 1981 and $115 million in 1980.

- The federal Tax Equity and Fiscal Responsibility Act of 1982 created a Federal Supplemental Compensation Program (FSC). This program provides supplemental benefits after exhaustion of regular state benefits (and extended benefits, when payable -- 100 percent federally financed -- giving a claimant ten, eight or six additional weeks of benefits depending upon the insured unemployment rate (IUR) in the state. In New York, benefits were limited to eight or six additional weeks. Benefits which first became payable for the week of unemployment beginning September 13, 1982 amounted to $94 million during 1982.

- There are programs that provide unemployment benefits to persons who worked for the federal government or were in the Armed Forces in the 52 weeks before initiating cliams. These benefits are fully-financed by the federal government. Payments to ex-servicemen totaled $3 million in 1982 compared with $16 million the previous year. Former federal employees received $10 million in unemployment benefits in 1982 and $14 million in 1981.

Hours and Earnings

In 1982, the average weekly wage of New Yorkers covered by unemployment insurance in the private wage and salary sector was $357.15,[1] up $27.75 or 8.4 percent from 1981. Production workers in manufacturing earned an average weekly wage of $323.98 in 1982, an increase of $15.08 from 1981. The average number of hours worked per week by factory production workers in 1982 was 38.8, or 0.6 of an hour less than in 1981. Average hourly earnings of production workers in 1982 was $8.35, which was $0.51 higher than in 1981.

---

[1] Preliminary estimate.

Major Labor Areas

Resident employment declined in 10 out of 12 of the state's major labor areas during 1982. On an annual average basis, the largest employment losses from 1981 to 1982 occurred in the 8-county New York City area, down 25,400 (-0.8 percent) and the Buffalo area, down 24,700 (-4.9 percent). The job losses in these two areas accounted for 70 percent of the statewide downturn in employment. The two major labor areas where the number of resident jobholders increased over the year were the Nassau-Suffolk area, up 11,900 (+1.0 percent) and the Poughkeepsie area, up 2,500 (+2.4 percent).

Every major labor area had a higher level of unemployment in 1982 than in 1981. Approximately two-thirds of the statewide upturn in joblessness occurred in the 8-county New York City area, up 20,700 (+6.8 percent); the Buffalo area, up 16,200 (+30.3 percent); the Long Island area, up 7,000 (+9.0 percent); and the Rochester area, up 6,700 (+24.2 percent).

The rise in joblessness among workers in the major labor areas resulted in higher unemployment rates in 1982. The Buffalo area again posted the highest rate of unemployment in the state, averaging 12.6 percent in 1982, up 3.1 percentage points from 1981. This was followed by the Elmira area, at 11.5 percent, up 3.7 percentage points; the Glens Falls area, at 9.6 percent, up 1.2 percentage points; and the Utica-Rome area, at 9.0 percent, up 1.4 percentage points. The Poughkeepsie area recorded the lowest unemployment rate, 5.9 percent, up 0.3 of a percentage point.

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for February 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
351	Engines and turbines	$382.97	36.3	$10.55
358	Refrigeration & service machinery	357.70	39.7	9.01
204	Grain mill products	459.80	45.3	10.15
238	Miscellaneous apparel & accessories	208.62	35.3	5.91
275	Commercial printing	418.24	38.3	10.92
31	Leather and leather products	207.57	37.0	5.61
317	Handbags and other personal leather goods	186.43	36.2	5.15
396	Costume jewelry, costume novelties, notions	211.85	36.4	5.82
481,2	Telephone and telegraph	510.34	40.6	12.57
	Hotels (year-round)	227.45	31.2	7.29

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for February 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
344	Fabricated structural metal products	$320.15	38.9	$8.23
205	Bakery products	332.90	40.4	8.24
231	Men's and boys' suits, coats and overcoats	253.12	35.6	7.11
30	Rubber and misc. plastics products	266.19	36.6	6.18
31	Leather and leather products	187.97	35.6	5.28
481,2	Telephone and telegraph	518.46	40.6	12.77
	Hotels (year-round)	286.57	33.4	8.58

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.

5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**

6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.

7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

B-PUBLICATIONS--Continued

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

LABOR RESEARCH REPORTS--Continued

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, and/part-time and temporary employment. Experiences of responding firms with various programs are presented in the report.

EMPLOYMENT REVIEW

APRIL 1983
VOL. 36 NO. 4

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Louis Schisa, Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
April 1983

Civilian Labor Force

Resident employment in New York State edged upwards 3,000 from March 1983 to 7,255,000 in April 1983. Compared with a year ago, the number of New Yorkers with jobs was lower by 96,000.

Total unemployment in the state was 714,000 in April 1983, a decline of 78,000 from a month ago, but an increase of 94,000 from a year ago.

The rate of unemployment in the state fell sharply between March and April 1983, dropping 0.8 of a percentage point to 9.0 percent. Nevertheless, the April 1983 rate was 1.2 percentage points higher than a year ago.

Nonfarm Employment

The nonagricultutal wage and salary job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 39,600 from March 1983 to 7,172,200 in April 1983 because of seasonal hiring by nonmanufacturing employers. However, this gain was almost 18,000 below the normal pace for this time of year.

The nonmanufacturing job level was 40,900 higher in April as compared with March 1983 -- far less than the usual March-April upturn. Below-seasonal expansion by most industry divisions, coupled with a drop in government employment, accounted for the shortfall. Trade (+16,500), the only industry division that met seasonal expectations, posted the largest gain, with nearly all of the job expansion in the retail category. Hiring was particularly brisk among restaurants. Payroll additions in the construction (+13,000) and services (+10,200) groups followed this increase. The gain in construction jobs was the third smallest April advance in 25 years as the spring buildup was affected by lingering winter weather and continuing rain. The services division was led by an upturn in the agricultural services and amusement and recreational services industries. The finance, insurance, and real estate (+2,600) and the transportation and public utilities (+500) groups also registered less-than-normal gains. The public sector (-2,000) was the only nonmanufacturing industry division to lose employment over the month. The bulk of the government job reduction occurred in the local education segment, reflecting short furloughs of unsalaried personnel because of spring recess and the discretionary use of "snow-days" by school districts.

Manufacturing employment in April declined 1,300 from a month ago as seasonal cutbacks among nondurable goods outweighed a below-normal upturn in durable goods jobs. A sharper-than-usual drop in apparel jobs (-2,700) dominated the payroll loss in soft goods employment (-1,700). The largest share of the apparel downturn occurred in the women's outerwear category. Another payroll reduction, primarily seasonal, occurred in the printing and publishing industry (-500). Job increases in the majority of the remaining soft goods industries tempered these decreases. The large advance in miscellaneous manufacturing employment (+600) was located in the toy-making segment.

The less-than-normal increase in durable goods employment (+400) could be traced to the tempering effect of contraseasonal job losses in the primary metals (-600) and nonelectrical machinery (-600) industries. Payroll cutbacks at a blast furnace and rolling and finishing mill, coupled with a strike in a nonferrous metals plant, accounted for a large portion of the drop in primary metals jobs. Layoffs resulting from a slackening in business activity in the special machinery industry were the main reason for the downturn in nonelectrical machinery jobs. Highlighting the hard goods industries, which reported higher job levels over the month, were the stone, clay, glass and concrete industry (+800), up seasonally, and the transportation equipment industry (+800), which was bolstering its staff to meet increased demand for motor vehicles and motor vehicle parts products.

The state's nonagricultural wage and salary job count in April 1983 was down 45,700 from the year-ago level. Heavy durable goods losses accounted for the largest share of the nonfarm job downturn.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

(Not seasonally adjusted)

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for March 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
254	Partitions and fixtures	$271.04	39.8	$6.81
357	Office, computing and accounting machines	375.16	41.5	9.04
201	Meat products	373.43	41.4	9.02
203	Preserved fruits and vegetables	289.67	39.9	7.26
391	Jewelry, silverware and plated ware	334.36	38.3	8.73

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

(See page i for explanation of data)

SIC Code	Industry	Average weekly hours		Average weekly overtime hours		Overtime hours as percent of total hours	
		Apr. 1983	Apr. 1982	Apr. 1983	Apr. 1982	Apr. 1983	Apr. 1982
	All manufacturing	39.1	38.7	2.3	2.1	6.0	5.5

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Report 15 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

15. **High-Technology Industries in NYS.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

B-PUBLICATIONS--Continued

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

LABOR RESEARCH REPORTS--Continued

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, and/part-time and temporary employment. Experiences of responding firms with various programs are presented in the report.

EMPLOYMENT REVIEW

MAY 1983
VOL. 36 NO. 5

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
May 1983

Civilian Labor Force

The level of employment among New York State residents dropped 55,000 from April 1983 to 7,200,000 in May 1983. Compared with a year ago, the current number of employed residents was lower by 199,000.

Total unemployment in the state was 669,000 in May 1983, a decline of 45,000 from a month ago, but an increase of 36,000 from a year ago.

The rate of unemployment among New Yorkers fell 0.5 of a percentage point from April 1983 to 8.5 percent in May 1983. Since May 1982, the jobless rate has risen 0.6 of a percentage point.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 48,000 between April and May 1983 to 7,220,200, primarily because of normal spring hiring in the nonmanufacturing sector. The nonfarm job upturn was in line with the average April-May increase for the last two years, but was considerably below the average for the last five years.

Nonmanufacturing payrolls in May 1983 were 46,300 higher than a month ago as all industry divisions increased seasonally. Over one-third of the nonfactory job expansion occurred in trade (+17,600), with hiring among restaurants accounting for the bulk of the advance. The construction (+13,000), government (+6,100), and services (+4,700) groups reported large payroll gains. The advent of warm weather triggered the upturn in construction activity, with the special trade contractor category responsible for half of the employment rise. Most of the increase in public employment occurred in local education as payrolls among school districts rebounded following the spring recess. Hiring in the hotel and motel, and recreational and amusement services industries led the upsurge in services employment. The remaining nonfactory divisions reported smaller seasonal job gains -- transportation and public utilities (+2,900), finance, insurance and real estate (+1,700), and mining (+100).

Largely because of additional durable goods jobs, manufacturing payrolls increased 1,700 in May 1983. However, both hard and soft goods segments experienced below-normal job growth for this time of year.

Job gains in the primary metals industry (+700) highlighted the advance in hard goods payrolls (+1,100). The upturn in primary metals employment was caused by job growth in the blast furnace industry and the return to work of strikers in the nonferrous metals industry. The majority of the remaining hard goods components experienced moderate seasonal gains. The only notable job loss occurred in the fabricated metals industry (-200), down because of a strike against a structural metal products plant.

Nondurable goods employment inched upward 600 this May in contrast to substantial gains in recent years. Most of the shortfall was attributable to job losses in the apparel industry (-300). Normally, there is a substantial job growth in May apparel jobs, but cutbacks in the women's outerwear category this year caused a decline. Layoffs in the chemical industry (-400) stemming from general sluggishness in business activity also contributed toward the below-normal rise in soft goods employment.

The largest job gains in the nondurable goods industries were reported by the textile (+900) and food (+300) industries. Seasonal hiring in knitting mills accounted for most of the staff expansion in textiles, while the increase in food employment was spread throughout the industry.

Since May 1982, the state has lost 55,600 nonfarm jobs, with the largest portion of the over-the-year loss in durable goods jobs.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

(Not seasonally adjusted)

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for April 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
203	Preserved fruits and vegetables	$290.03	39.3	$7.38
231	Men's & boys' suits, coats & overcoats	254.88	35.4	7.20

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for April 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
275	Commercial printing	$489.72	37.7	$12.99

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Report 15 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

15. **High-Technology Industries in NYS.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

B-PUBLICATIONS--Continued

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

LABOR RESEARCH REPORTS--Continued

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

EMPLOYMENT REVIEW

JUNE 1983
VOL. 36 NO. 6

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
June 1983

Civilian Labor Force

The number of New York State residents with jobs increased 259,000 from May 1983 to 7,459,000 in June 1983, or 19,000 higher than the resident employment level recorded 12 months ago.

Unemployment in the state totaled 750,000 in June 1983, a gain of 81,000 from a month ago and an increase of 55,000 from a year ago.

The rise in unemployment caused the state's jobless rate to jump 0.6 of a percentage point between May and June 1983 to 9.1 percent. Since June 1982, the unemployment rate has risen 0.6 of a percentage point.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) rose 44,300 from May 1983 to 7,264,500 in June 1983, primarily the result of seasonal influences. Job additions in the nonmanufacturing sector accounted for 75 percent of the nonfarm upturn. However, the May-June 1983 payroll advance was well-below the average gain (62,600) for the last five years.

Nonmanufacturing payrolls increased 33,300 between May and June 1983, or 12,200 short of the comparable average gain over the last five years. A large portion of the shortfall could be traced to the public sector and the transportation and public utilities group. Government employment, which normally shows a moderate increase in June, fell 3,400. The decline occurred because of budget-related cutbacks and early retirements in state government in addition to seasonal layoffs of hourly personnel in the state university system, and local community colleges and public schools. A labor-management dispute in the utilities industry tempered the rise in transportation and public utilities jobs (+1,500). The nonmanufacturing job expansion that did occur was led by staff expansion in trade (+14,400), particularly in the restaurant and food store portions of the industry. Favorable weather prompted the payroll growth in the construction indutry (+8,600) -- the special trade contractor segment accounted for over half of the job advance. These job additions were followed by gains in the services (+6,200) and finance, insurance, and real estate (+6,000) industry divisions. The seasonal rise in services employment was augmented by the return to work of strikers in the health services and amusement and recreational services categories. Hiring in the finance and real estate portions accounted for the employment advance in the finance, insurance, and real estate division.

Manufacturing employment expanded 11,000 in June 1983, but was constrained for this time of year because of limited summer hires and was reminiscent of increases in factory employment during periods of slowed business activity. Both hard and soft goods segments experienced reduced seasonal hiring. The nondurable goods industry group added 6,100 jobs in June, with the largest advances registered by the apparel (+2,000) and food (+1,200) industries. Hires in the women's outerwear industry dominated the gain in apparel jobs, while the rise in food payrolls was distributed throughout the industry. Smaller increases, mainly seasonal, occurred among the remaining soft goods industries, except for the tobacco industry, which remained unchanged.

Durable goods payrolls increased 4,900 between May and June, with the bulk of the expansion concentrated in the electrical machinery (+2,200) and nonelectrical machinery (+1,600) industries. Job hikes in the communication equipment and electronic component industries led the rise in electrical machinery employment, while hiring in the office, computing and accounting industry dominated the nonelectrical machinery job advance. The only hard goods components that lost jobs over the month were the instruments, photo and optical goods industry (-800) and the primary metals industry (-300). The loss in instruments jobs was a continuation of permanent layoffs and induced attrition, which began in early 1983; particularly hard-hit was the photographic industry, which has cut back over 6,000 jobs since January of this year. Nearly all of the decline in primary metals jobs could be traced to payroll decreases in the blast furnace industry.

Since June 1982, the state's nonfarm job level has fallen 55,800, primarily because of losses in the factory sector.
